Wave functions from fragment wave functions 13

Instructions to Authors

Manuscripts should be *submitted in duplicate*, typed in double-line spacing on one side of the paper only. Form and contents should be carefully checked to exclude the need for corrections in proof. The author should mark in the margin where diagrams and tables should be inserted.

To speed up publication, authors will receive only *one set of proofs:* provisionally numbered page proofs. Authors are requested to correct typographical errors only; they will be charged for corrections involving changes, additions, or deletions to the original manuscript.

Formulae should be typewritten whenever possible, special attention being given to the placing of indices and exponents so that they are recognizable as such even though there is no difference in size. Formulae should preferably be written in a "linear" form e. g. $\exp(-\varepsilon/kT)$ instead of $e^{-\frac{\varepsilon}{kT}}$). Special typefaces (Greek, Script) should be shown by underlining in color. To avoid confusing the printer, please use red for Greek and green for Script, and underline in brown for bold face.

The following are *frequently confused:*

$\cup, \cup, \bigcup, U$; $\circ, o, O, 0$; $\times, x, X, \varkappa, \chi$; $\vee, v, \nu$; $0, \Theta, \phi, \varphi, \Phi, \varnothing, \emptyset$; ψ, Ψ; $\varepsilon, \in$; $1, l$:

a', a^1; the symbol a and the indefinite article a;

also the handwritten Roman letters:

c, C; e, l; I, J; k, K; o, O; p, P; s, S; u, U; v, V; w, W; x, X; z, Z;

Please take care to distinguish them in some way: preferably small letters should be underlined once and capital letters twice.

The papers should be preceded by an *English summary* of not more than 100 words. Papers not written in English should have an English translation of the title.

Immediately following the summary, a list of *key words* (not exceeding five items normally) should be supplied for subject indexing.

Literature references should be numbered and listed at the end of the paper. They should be cited as follows: *journal papers* — names and initials of all authors, journal with abbreviations according to the I.U.P.A.C. list (Chemical Abstracts, Vol. 55, 1961), volume and page number, year in parentheses; *books* — names of authors, full title, edition, place, publisher and year. References should be cited in the text by number.

Figures, graphs, tables and structural formulae should be separated from the text and be numbered. Original drawings and graphs should be made in Indian ink with lines of uniform thickness. Authors should keep in mind that drawings will be reduced to a size not exceeding 12 × 19,5 cm. In general it should be assumed that the same degree of reduction will apply to all figures in the same paper. Inscriptions should allow for any reduction in scale — a capital letter should be about 1.8 mm in hight in the final version. Computer print-outs should be black and evenly printed to allow direct reproduction.

Captions, which should be brief, should be typed separately and attached to the manuscript.
